

What is claimed is:

1. A composition comprising: a fragrance material; said fragrance material encapsulated by a polymer to provide a polymer encapsulated fragrance; the polymer encapsulated fragrance is further coated by a polyamine polymer or mixture of polyamines.
2. The composition of claim 1 wherein the polyamine product is a cationic polyamine product.
3. The composition of claim 1 wherein the polyamine product is a reaction product of a polyamine and an oxirane material.
4. The composition of claim 1 wherein the polyamine product is a reaction product of 1H-Imidazole and an oxirane material.
5. The composition of claim 1 wherein the polyamine product is a reaction product of melamine and an oxirane material.
6. The composition of claim 1 wherein the polyamine product is a reaction product of alkanedioic acids, polyamines and an oxirane.
7. The composition of claim 1 wherein the polyamine product is a polyamido amine or polyaminoamide-oxirane reaction product.
8. The compositions of claims 3, 4, 5, 6, and 7 wherein the oxirane material is selected from the group selected of (chloromethyl) oxirane, (bromoethyl) oxirane and mixtures thereof.

9. The composition of claim 1 wherein the fragrance is a liquid thereby providing a liquid core to the polymer encapsulated fragrance.
10. The fragrance of claim 1 wherein the fragrance material is not water soluble.
11. The composition of claim 1 wherein the fragrance material is from about 10 to about 50 weight percent of the composition.
12. The composition of claim 1 which is incorporated into a product selected from the group consisting of a personal care, fabric care and cleaning products.
13. The composition of claim 9 wherein the personal care product is selected from the group consisting of hair shampoos, hair rinses, bar soaps, and body washes.
14. A method for imparting an olfactory effective amount of fragrance into a wash-off product comprising:
 - providing a fragrance material;
 - encapsulating the fragrance material with a polymer to form a polymer encapsulated fragrance;
 - providing a cationic polymer to the surface of the polymer encapsulated fragrance to form a cationically coated polymer encapsulated material; and
 - providing the coated polymer encapsulated material to a rinse off product.
15. The method of claim 11 wherein the encapsulating polymer is selected from a vinyl polymer; an acrylate polymer, melamine-formaldehyde; urea formaldehyde and mixtures thereof.

16. The composition of claim 1 wherein the polymer coating comprises a reaction product of polyamines and (chloromethyl) oxirane or (bromomethyl) oxirane and an additional cationic polymers. halides.
17. A wash-off product comprising an olfactory effective amount of the compound of claim 1.
18. The wash-off product of claim 15 wherein the wash-off product is selected from the group consisting of personal care, fabric care and cleaning products.
19. A wash-off product comprising the composition of claim 1 and a silicone material.
20. The wash-off product of claim 19 wherein the wash-off product is a fabric rinse conditioner.
21. The wash-off product of claim 20 having a surfactant level of from about 5 to 30 weight percent.
22. The wash-off product of claim 20 having a calcium chloride level of from about 0.05 to about 1 weight percent.
23. The wash-off product of claim 19 where the silicone level is from about 0.5 to 8 weight percent of product.
24. The wash-off product of claim 23 wherein the wash-off product is a fabric rinse conditioner.
25. The wash-off product of claim 24 wherein the softening agent is provided at a level of from about 10 to about 20 weight percent.
